

Adapting to Climate Change in Lancashire

17th May, 2pm @The Barn,

Lancashire Wildlife Trust HQ, PR5 6BY

Natural England has been researching the adaptation of landscapes to Climate Change, from the broad scale down to more specific Landscape Character Areas at the local scale. This event will cover the findings from the work on the lowlands of Lancashire, Forest of Bowland AONB, and also present action on the way forward.

Lancashire's Natural Environment Service would like to invite you to attend and help identify action at the district level.
